*Plants at work deliver results: A beautiful environment, cleaner air and healthier employees. The bottom-line? **Increased Profits!!!***

Businesses and organizations are now realizing increased profits through the use of live plants throughout their offices and buildings.

- Plant-filled rooms contain 50% to 60% fewer airborne molds and bacteria than rooms without plants.
- Office workers are up to 12% more productive and accrue less sick time in offices with plants.
- Major buildings command and receive up to 20% higher lease rate premiums when they have lush and attractive lobbies.
- Malls with park-like interiorscapes have 15% higher sales per square foot.
- Hotels with major interiorscaping have higher room rates and higher occupancy rates.

Create A Positive Work Space!

Plants in your office or home are decorative and scientists have found that plants help to change moods and create a positive work place. NASA scientists have found interior plants to be extremely potent in purifying interior air.

Plants are beautiful, mysteriously silent living companions, purifying the air we breath. Complimentary and harmonious, they fill our intimate environments with grace. Life is simply more pleasurable, as plants uplift our human spirit. — Siri Datta

The appearance of a lush and well-kept interior landscape, with well positioned and unusual exotic plants, makes an immediate and lasting impression. Your interiorscape's features convey the image you wish to present to your occupants and visitors.

At The Resource Collection, we listen, focus, understand, install and maintain the image you desire.

We would like to meet with you if you are interested in achieving an image, an improved appearance, a showplace.
